EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Specification, page 1, line 5, "claims priority to" has been deleted and --is a continuation of-- has been inserted therefor.

2. The following is an examiner's statement of reasons for allowance:

Per claim 1, while it is known in the art to provide ozone to water and flow the water over algae (see US Pat No 5,037,550 to Montagnon et al.) and it is known to utilize attached algae to remove contaminants from water (see US Pat No 4,333,263 to Adey), in the examiner's opinion, the prior art fails to teach or render obvious combining the known elements with the step of adding a pesticide to a colony base.

Per claims 2 and 8, while it is known in the art that applying ozone to the water may enhance biological activity (see reference AR of the IDS), the prior art fails to teach or fairly suggest, in particular, the ozone making nutrients more amenable to bioassimilation by attached algae to enhance photosynthetic activity or destroying periphyton-consuming organisms and eggs.

Per claim 9, while it is known in the art that applying ozone to the water may enhance biological activity (see reference AR of the IDS), the prior art fails to teach or

Application/Control Number: 10/827,116

Art Unit: 1724

fairly suggest, in particular, the ozone making nutrients more amenable to bioassimilation by attached algae, the zone being added in such a way to optimize contact with components in the water.

Per claims 10, 11, and 17, while it is known in the art to provide ozone to water and flow the water over algae (see US Pat No 5,037,550 to Montagnon et al.) and it is known to utilize attached algae to remove contaminants from water (see US Pat No 4,333,263 to Adey), the prior art fails to teach or fairly suggest a system combining the known elements with means for channeling the water as recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fred Prince whose telephone number is (571) 272-1165. The examiner can normally be reached on Monday-Thursday, 6:30-4:00; alt. Fridays 6:30-3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on (571) 272-1166. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
